|--|------------|
| Preface | V |
| The Editors and Contributors | VII |
| 1 Introduction to Elastic Yarns and Textiles | 1 |
| 2 Elasticity in the Textile Context | 5 |
| 2.1 General Definition of the Term “Elasticity” and Mechanical Loading Parameters | 5 |
| 2.1.1 Energy Elasticity | 6 |
| 2.1.2 Entropy Elasticity | 8 |
| 2.1.3 Features concerning Elasticity in Textile Applications | 9 |
| 2.2 Terminology | 9 |
| 2.2.1 General Textile Terms | 9 |
| 2.2.2 Elastic Behavior and Textile Elasticity | 10 |
| 2.3 Options for Obtaining Textile Elasticity | 11 |
| 2.4 Characteristic Regions of the Mechanical Behavior Curves of Elastic Yarns | 13 |
| 3 Spinning Technologies for Elastic Yarn Production | 21 |
| 3.1 Functional Principle of Filament Yarn Production | 21 |
| 3.2 Available Spinning Technologies | 22 |
| 3.2.1 Melt Spinning | 22 |
| 3.2.2 Solution Spinning | 23 |
| 3.2.2.1 Dry Spinning | 23 |
| 3.2.2.2 Wet Spinning | 24 |
| 3.2.3 Reactive Spinning | 25 |

| | | |
|----------|--|-----------|
| 3.3 | Elastanes: Elastic Yarns Made from Elastomeric Polyurethanes | 25 |
| 3.3.1 | Elastane Formation | 25 |
| 3.3.2 | Internal Structure of Elastomers | 28 |
| 3.3.3 | Features of Elastanes | 29 |
| 4 | State-of-the-Art Elastane Production | 33 |
| 4.1 | Modern Elastane Production via Dry Spinning | 33 |
| 4.2 | Modern Elastane Chemistries | 35 |
| 4.3 | Specialty Grades of Elastane | 38 |
| 4.3.1 | Soft Stretch: LYCRA® ADAPTIV Fiber | 38 |
| 4.3.2 | Black Elastane: LYCRA® BLACK Technology | 40 |
| 4.3.3 | Chlorine-Resistant Elastane: LYCRA® lastingFIT Technology | 41 |
| 4.3.4 | Dyeable Elastane: LYCRA® LIVING LIGHTS Technology | 42 |
| 4.3.5 | Seam Slippage in Elastane: LYCRA® Anti-Slip | 42 |
| 5 | Elastic Thermoplastic Polyurethane Yarns | 45 |
| 5.1 | Basic Thermoplastic Polyurethane Chemistries | 45 |
| 5.2 | Opportunities and Challenges of Elastic TPU Yarns | 47 |
| 5.3 | Production of Elastic TPU Yarns | 49 |
| 5.3.1 | Extrusion | 49 |
| 5.3.2 | Requirements on Surfaces | 50 |
| 5.3.3 | Winding | 51 |
| 5.4 | Mechanical Properties of Elastic TPU Yarns | 51 |
| 5.5 | Available Industrial Melt Spinning Technologies | 53 |
| 6 | Elastic Polyamide Yarns | 57 |
| 6.1 | Introduction to Polyamides | 57 |
| 6.2 | Comfort Stretch by Nylon 6.6: SENSIL® Flow | 58 |
| 7 | Winding of Elastic Yarns | 61 |
| 7.1 | Current Developments in Elastic Yarn Production | 61 |
| 7.2 | Winding Technology | 62 |
| 7.2.1 | Overview | 62 |
| 7.2.2 | Description of Winders | 64 |
| 7.2.3 | Bobbin Formation | 65 |
| 7.2.3.1 | Helix Angle | 65 |
| 7.2.3.2 | Yarn Tension | 67 |

| | | |
|----------|---|-----------|
| 7.2.3.3 | Traverse Wobble | 68 |
| 7.2.3.4 | Contact Pressure | 70 |
| 7.2.4 | Winding Problems and Possible Solutions | 70 |
| 7.2.4.1 | Correction of Saddles | 71 |
| 7.2.4.2 | Correction of Bulging | 71 |
| 7.2.4.3 | Correction of Ribbons (Mirror Effect) | 73 |
| 7.2.4.4 | Correction of Overthrown Ends | 74 |
| 7.2.4.5 | Correction of Loops | 75 |
| 8 | Elastic Combination Yarns | 77 |
| 8.1 | Introduction | 77 |
| 8.2 | Physical Properties of Covered Yarns | 79 |
| 8.3 | Production of Elastic Combination Yarns | 80 |
| 8.3.1 | Classic Covering Using the Hollow Spindle Method | 80 |
| 8.3.2 | Reverse Twisting Using the Hamel Hollow Spindle Process | 83 |
| 8.3.2.1 | Preparing the Flanged Spools | 83 |
| 8.3.2.2 | Re-twisting on the Elasto Twister | 83 |
| 8.3.3 | Air-Entangled Twisted Yarns/Air-Entangled Yarns | 85 |
| 8.3.4 | Production of Elastic Twisted Yarns on Two-for-One Twisting Machines | 86 |
| 8.3.5 | Elastic Core-Spun Yarns | 87 |
| 8.3.6 | Sirospun Method | 88 |
| 8.4 | Areas of Application for Elastic Combination Yarns and Twisted Yarns .. | 89 |
| 8.5 | Summary | 90 |
| 9 | Quality Control of Elastic Yarns | 91 |
| 9.1 | Determination of Linear Density of Elastic Yarns | 91 |
| 9.2 | Determination of Breaking Strength and Elongation of Bare Elastic Yarns | 93 |
| 9.3 | Determination of Breaking Strength and Elongation of Elastic Combination Yarns | 97 |
| 9.4 | Determination of Elastic Properties of Elastic Yarns | 97 |
| 9.5 | Characterization of Interlaces in Elastic Air-Covered and Core-Textured Yarns | 99 |
| 9.6 | Final Remarks | 101 |

| | | |
|-----------|--|------------|
| 10 | The Market of Elastic Yarns | 103 |
| 10.1 | Spandex in the Global Total Mill Consumption | 104 |
| 10.2 | Global Demand for Spandex | 107 |
| 10.3 | Regional Supply of Spandex | 109 |
| 10.3.1 | China | 109 |
| 10.3.2 | The Americas | 110 |
| 10.3.3 | Rest of Asia | 111 |
| 10.3.4 | Europe | 112 |
| 10.4 | The Market of Non-Spandex Elastic Yarns | 113 |
| 11 | Weft-Knitted Elastic Fabrics | 115 |
| 11.1 | Elastic Structure of Knitted Fabrics | 117 |
| 11.1.1 | Single-Bed Knitting Machines | 118 |
| 11.1.2 | Double-Bed Knitting Machines | 119 |
| 11.2 | Elastic Yarn Integration in Weft-Knitted Fabrics | 121 |
| 11.2.1 | Integration of Bare Elastic Yarns | 122 |
| 11.2.2 | Integration of Elastic Covered Yarns | 124 |
| 11.3 | Knitting Machines and Typical Products | 125 |
| 11.3.1 | Circular Knitting Machines | 125 |
| 11.3.1.1 | Small Circular Knitting Machines | 126 |
| 11.3.1.2 | Large Circular Knitting Machines | 127 |
| 11.3.1.3 | Body-Size Seamless Machines | 127 |
| 11.3.2 | Flat Knitting Machines | 127 |
| 12 | Warp-Knitted Elastic Fabrics | 131 |
| 12.1 | Elastic Structure of Warp-Knitted Fabrics | 133 |
| 12.2 | Elastic Yarn Integration in Warp-Knitted Fabrics | 134 |
| 12.2.1 | Manufacturing Process | 135 |
| 12.2.2 | Calculation of Yarn Run-in and Effective Fineness for Elastic Yarns | 136 |
| 12.3 | Warp-Knitting Machines | 137 |
| 12.3.1 | Tricot Machine | 137 |
| 12.3.2 | Raschel Knitting Machine | 138 |
| 12.4 | Selected Lappings of Elastic Warp Knits | 138 |
| 12.4.1 | Locknit | 138 |
| 12.4.2 | Powernet | 139 |
| 12.4.3 | Safety Stretch | 140 |

| | | |
|-----------|---|------------|
| 13 | Woven Elastic Fabrics | 143 |
| 13.1 | Elastic Structure of Woven Fabrics | 145 |
| 13.2 | Elastic Yarn Integration in Weaving | 145 |
| 13.2.1 | Cross-Elastic Fabrics with Elastane | 146 |
| 13.2.2 | Longitudinally Elastic or Bielastic Fabrics with Elastane | 148 |
| 13.2.3 | Elastic Cord Fabric | 148 |
| 13.2.4 | Recycling of Elastic Fabrics | 148 |
| 13.3 | Weaving Machines and Typical Products | 149 |
| 13.3.1 | Shuttle | 149 |
| 13.3.2 | Rapier | 150 |
| 13.3.3 | Needle | 150 |
| 13.3.4 | Product Examples | 151 |
| 13.4 | Quality Requirements | 151 |
| 13.4.1 | Permanent Strain | 151 |
| 13.4.2 | Seam Slippage Behavior | 152 |
| 13.4.3 | Dimensional Stability and Shrinkage | 152 |
| 13.4.4 | Colorfastness | 153 |
| 13.4.5 | Reproducibility and Production Safety | 153 |
| 13.4.6 | Costs | 154 |
| 13.4.7 | Product Aspect/Appearance | 154 |
| 13.4.8 | Haptic Behavior | 154 |
| 14 | Elastic Textiles in the Dyehouse | 157 |
| 14.1 | Introduction | 157 |
| 14.2 | Elastanes | 157 |
| 14.3 | Types of Elastic Textiles | 158 |
| 14.4 | Dyeing of Material Blends Containing Elastane | 159 |
| 14.4.1 | Pretreatment | 159 |
| 14.4.2 | Heat-Setting | 159 |
| 14.4.3 | Wetfastness | 160 |
| 14.5 | Dyeing of Elastic Textiles | 160 |
| 14.5.1 | Cotton Jersey | 160 |
| 14.5.2 | Cotton–Elastane and Viscose–Elastane Blends | 161 |
| 14.5.3 | Polyester–Elastane Blends | 163 |
| 14.5.4 | Polyamide–Elastane | 164 |
| 14.6 | Ecological Considerations | 166 |

| | | |
|-----------|--|------------|
| 15 | Elastic Yarns from Renewable Resources | 167 |
| 15.1 | Renewable Resources | 167 |
| 15.2 | Renewable Materials for Elastic Polyurethanes | 168 |
| 15.2.1 | Polyols from Renewable Resources | 169 |
| 15.2.2 | Isocyanates from Renewable Resources | 171 |
| 15.2.3 | Non-Isocyanate Polyurethane | 171 |
| 15.3 | Commercially Available Elastic Polyurethane Products from Renewable Resources | 172 |
| 15.3.1 | Raw Materials for Elastic Polyurethanes from Renewable Resources | 172 |
| 15.3.2 | Thermoplastic Polyurethanes from Renewable Resources | 173 |
| 15.3.3 | Elastic Polyurethane Yarns from Renewable Resources | 175 |
| 15.4 | Final Remarks | 177 |
| 16 | Sorting and Recycling of Elastic Textiles | 181 |
| 16.1 | The Waste Chain of Textiles | 182 |
| 16.2 | Automated Sorting for Recycling | 184 |
| 16.3 | Textile Recycling Technologies | 186 |
| 16.3.1 | Mechanical Recycling | 187 |
| 16.3.2 | Thermomechanical Recycling | 188 |
| 16.3.3 | Physicochemical Recycling | 189 |
| 16.3.4 | Chemical Recycling | 189 |
| 16.3.5 | Thermochemical Recycling | 190 |
| 16.4 | Summary and Outlook | 191 |
| 17 | Elastic Textiles in Medical Technology | 195 |
| 17.1 | Overview of Materials and Textiles Used in Medical Products | 195 |
| 17.2 | Properties and Applications of Elastic Medical Textiles | 196 |
| 17.3 | Medical Compression Textiles | 199 |
| 17.4 | Implants for Medical Applications | 202 |
| 17.4.1 | Surgical Sutures—Elasticity on Fiber Level | 202 |
| 17.4.2 | Hernia Meshes—Elasticity on Textile Level | 204 |

| | | |
|-----------|---|------------|
| 18 | Shape Memory Polymer Filaments | 209 |
| 18.1 | Introduction | 209 |
| 18.2 | Fundamentals of Shape Memory Polymers | 210 |
| 18.2.1 | Definition of Shape Memory Polymers | 210 |
| 18.2.2 | Triggers for the Shape Memory Effect | 211 |
| 18.2.3 | Mechanism behind the Shape Memory Effect | 212 |
| 18.2.4 | Thermomechanical Cycle of Shape Memory Polymers | 213 |
| 18.2.4.1 | Programming | 214 |
| 18.2.4.2 | Activation | 215 |
| 18.2.5 | Types of Shape Memory Polymers | 215 |
| 18.2.5.1 | Multi-Way Shape Memory Effect | 215 |
| 18.2.5.2 | Reversible Shape Memory Effect | 217 |
| 18.3 | Shape Memory Polymer Filaments | 219 |
| 18.3.1 | Spinning Methods and Influences | 219 |
| 18.3.2 | Applications of Shape Memory Polymer Filaments | 220 |
| 19 | Elastic Workwear | 227 |
| 19.1 | Workwear | 227 |
| 19.1.1 | Types of Workwear | 227 |
| 19.1.2 | Market for Workwear | 229 |
| 19.2 | Introduction to Polyolefins | 229 |
| 19.2.1 | Polypropylene | 230 |
| 19.2.2 | Polyethylene | 231 |
| 19.2.3 | Polyvinyl Chloride | 232 |
| 19.3 | Elastic Yarn Type Based on Polyolefins: XLANCE® | 232 |
| 19.4 | Sustainability of Workwear | 234 |
| | Index | 237 |
