Acknowledgment	V
Preface to the First Edition	VII
Comments on the Second Edition	VIII
1 Introduction	1
1.1 The Meaning and Significance of Flame Retardants	1
1.2 Scope of This Edition	3
1.3 References	3
2 Flame Retardants in Commercial Use or Development for Polyolefins, Olefin Copolymers, and Diene Elastomers	5
2.1 Introduction	5
2.2 Generalizations	6
2.3 Endothermic Additives (Mainly Metal Hydroxides)	7
2.3.1 Alumina Trihydrate (Aluminum Trihydroxide, ATH; Mineral Name: Bauxite)	7
2.3.2 Properties of ATH	8
2.3.3 ATH Modifications	8
2.3.4 Synergists and Adjuvants with ATH	9
2.3.5 Magnesium Hydroxide (Magnesium Dihydroxide, MDH)	10
2.3.6 Synergism of MDH with Borates	11
2.3.7 Other Synergistic MDH Combinations	12
2.3.8 Huntite-Hydromagnesite Mixture	12
2.3.9 Talc	13
2.4 Halogenated Flame Retardants	13
2.4.1 Chloroparaffins	14
2.4.2 Dechlorane Plus®	15

2.4.3	Brominated Additives	16
2.4.3.1	Decabromodiphenyl Oxide, Decabromodiphenyl Ether, ("Decabrom")	16
2.4.3.2	Tetradecabromodiphenoxybenzene	17
2.4.3.3	Decabromodiphenylethane, DBDPE	17
2.4.3.4	Tetrabromobisphenol A (TBBA)	18
2.4.3.5	Tetrabromobisphenol A bis(2, 3-dibromopropyl ether)	18
2.4.3.6	Hexabromocyclododecane	19
2.4.3.7	Ethylenebis(tetrabromophthalimide)	19
2.4.3.8	Bis(2-ethylhexyl) Tetrabromophthalate	20
2.4.3.9	Tris(tribromoneopentyl) Phosphate	20
2.4.3.10	Comparison of Bromine-Containing Flame Retardants for V2 Ratings in Polypropylene	20
2.4.3.11	Poly(pentabromobenzyl) Acrylate	21
2.4.4	Oligomeric or Polymeric Brominated Phenoxyphenylene Ethers	21
2.5	Antimony Trioxide	22
2.6	Phosphorus Additives	22
2.6.1	Intumescent Phosphorus-Based Additive Systems	23
2.6.1.1	Ammonium Polyphosphate	23
2.6.1.2	Ammonium Polyphosphate-Based Intumescent Additives	24
2.6.1.3	Melamine Phosphates	25
2.6.1.4	Ethylenediamine Phosphate	25
2.6.1.5	Inorganic Synergists for APP-Based Intumescent Systems	26
2.6.1.6	Other Intumescent Systems	26
2.6.2	Red Phosphorus	27
2.6.3	Diethylphosphinate Al Salt	27
2.6.4	Other Phosphorus Additives	27
2.7	Expandable Graphite	28
2.8	Co-additives; Hindered Amines	29
2.9	Nanocomposites	30
2.10	Polyolefin Modifications	31
2.11	Blends of Polyolefins with Char-Forming Polymers	32
2.12	Silicone Synergists	32
2.13	Layered Polymer Approaches	33
2.14	Specific Applications	33
2.14.1	Wire and Cable Insulation	33
2.14.2	Wood-Polyolefin Blends	34

2.15	Flame Retardant Elastomers	35
2.15.1	General Comments	35
2.15.2	Diene Elastomers	35
2.15.3	Chloroparaffins in Elastomers	36
2.15.4	Zinc Borates in Elastomers	37
2.15.5	Bromine Compounds in Elastomers	38
2.15.6	Phosphorus Compounds in Elastomers	39
2.15.7	ATH and MDH in Elastomers	39
2.15.8	Clays in Elastomers	40
2.15.9	(Poly)chloroprene and other Halogen-Containing Elastomers ..	41
2.15.10	Chlorinated and Chlorosulfonated Polyethylenes	42
2.16	Future Trends	42
2.17	References	42
3	Flame Retardants in Commercial Use or Development for Polystyrenes, Thermoplastic Styrene Copolymers, and Blends	49
3.1	Introduction	49
3.2	General Comments on the Fire Properties of Styrenic Polymers	50
3.3	Crystal Polystyrene	50
3.4	Expandable Polystyrene and Extruded Polystyrene Foam	51
3.4.1	Hexabromocyclododecane (HBCD)	51
3.4.2	Other Bromine Flame Retardants in Expanded Polystyrene ...	53
3.4.3	Brominated Styrene-Butadiene Polymer	54
3.4.4	The Flammability Effect of the Expanding Agent	54
3.4.5	Synergists with Brominated Additives in Polystyrene Foam ...	55
3.4.6	Phosphorus-Bromine Combinations in Polystyrene Foam	55
3.4.7	Nonbromine Systems in Polystyrene Foam	56
3.4.8	The Recommended Fire-Safe Use of Extruded Polystyrene Insulation	57
3.5	High Impact Polystyrene	58
3.5.1	Bromine-Containing Flame Retardants for HIPS	58
3.5.1.1	Decabromodiphenyl Oxide (Ether) in HIPS	59
3.5.1.2	Decabromodiphenylethane	59
3.5.1.3	2, 4, 6-Tris(2, 4, 6-Tribromophenoxy)-1, 3, 5-Triazine ...	60
3.5.1.4	Modified Brominated Epoxy Oligomers and Polymers .	61
3.5.1.5	Brominated Lower Molecular Weight Polystyrenes	62
3.5.1.6	Tetrabromobisphenol A	62
3.5.1.7	Tetrabromobisphenol A Bis(2,3-Dibromopropyl Ether)	62
3.5.1.8	Light-Stable Bromine Additives: 1, 2-Ethylenebis(tetra- bromophthalimide) and Tris(tribromoneopentyl) Phosphate	63

3.5.1.9	Comparison of Typical Formulations of Brominated Flame Retardants in HIPS	63
3.5.1.10	The Dripping Problem and Antidripping Additives	64
3.5.1.11	The Effect of Brominated Flame Retardants and Antimony Oxide on Mechanical Properties of HIPS ...	64
3.5.2	Nonhalogen Flame Retardants for HIPS	65
3.6	Flame Retarded Acrylonitrile-Butadiene-Styrene Copolymers (ABS and SBR)	66
3.6.1	Brominated Flame Retardants Used in ABS	67
3.6.2	Chlorinated Additives for ABS or HIPS	69
3.6.3	Phosphorus Flame Retardants for ABS	70
3.7	Polyphenylene Oxide (PPO) Blends (Alloys) with HIPS	71
3.8	Flammability Requirements and Tests	73
3.9	Mechanistic Considerations as a Guide for Flame Retardation of Styrenics	73
3.9.1	Vapor Phase Mechanisms in Styrenics and Some Implications	74
3.9.2	The Smoke Problem with Styrenics	74
3.9.3	Condensed Phase Mechanisms in Styrenics	75
3.10	Summary and Future Trends	76
3.11	References	76
4	Flame Retardants in Commercial Use or Development for Vinyl Chloride Polymers	83
4.1	Introduction	83
4.2	Plasticized (Flexible) PVC	85
4.3	Antimony Trioxide and Related Products	86
4.3.1	Antimony Trioxide Alternatives	88
4.3.2	Halogenated Phthalate Plasticizers	89
4.4	Chlorinated Paraffins	89
4.5	Inorganic Flame Retardants, Synergists and Smoke Suppressants	90
4.5.1	Alumina Trihydrate (Aluminum Trihydroxide, ATH)	90
4.5.2	Magnesium Hydroxide and Related Magnesium Minerals	93
4.5.3	Molybdenum Compounds	94
4.5.4	Copper Compounds	95
4.5.5	Zinc Borates, Barium Borate, Calcium Borate	96
4.5.6	Zinc Stannates	97
4.5.7	Zinc Sulfide	98
4.5.8	Calcium Carbonate	98
4.5.9	Smoke Suppressants – General Comments	98

4.6	Low Flammability Plasticizers: Phosphate Esters	99
4.6.1	Triaryl Phosphates	100
4.6.2	Alkyl Diphenyl Phosphate Plasticizers	101
4.6.3	Comparison of Some Flame-Retardant and Nonflame-Retardant Plasticizers	102
4.6.4	Comparison of Various Combinations of Plasticizers and Other Additives	103
4.7	Formulating for Specific Applications	103
4.7.1	Calendered Vinyls	104
4.7.2	Plenum Wire and Cable	105
4.7.3	Coated Textile Applications	109
4.7.4	Vinyl Flooring	110
4.8	PVC from a Safety and Environmental Point of View	110
4.9	References	112
5	Flame Retardants in Commercial Use or Development for Flame Retardancy of Polyamides	115
5.1	Introduction	115
5.2	Additives for Polyamide 6 and 66 in Engineering Thermoplastic Applications	117
5.2.1	Chlorinated Additives	117
5.2.2	Brominated Additives	118
5.2.2.1	Decabromodiphenyl Oxide and Other Polybrominated Diphenyl Oxides	118
5.2.2.2	Decabromodiphenylethane	119
5.2.2.3	Polymeric Dibromophenylene Oxide	119
5.2.2.4	Brominated Polystyrenes	120
5.2.2.5	Brominated Epoxy Polymers as Additives	122
5.2.2.6	Polypentabromobenzyl Acrylate as Additive; Comparison with Other Bromoaromatic Additives	123
5.3	Melamine Cyanurate	124
5.3.1	Other Melamine Additives	126
5.4	Inorganic Hydrates	127
5.4.1	Magnesium Hydroxide	127
5.4.2	Alumina Monohydrate (Boehmite)	128
5.5	Phosphorus Additives	129
5.5.1	Red Phosphorus	129
5.5.2	Metal Dialkylphosphinates	131
5.5.3	Hypophosphite Salts	133

5.6	Drip Retarding Additives	134
5.7	Treated Glass Fiber Reinforcement	134
5.8	Textile Fiber Applications	134
5.9	References	136
6	Flame Retardants in Commercial Use or Development for Thermoplastic Polyesters	141
6.1	Introduction	141
6.2	Polyethylene Terephthalate	141
6.2.1	Textile Fiber Flame Retardance by Melt-Spinning Additives ...	141
6.2.2	Dihydrooxaphosphaphenanthrene Reactant in Polyethylene Terephthalate and Polytrimethylene Terephthalate	142
6.2.3	Phosphinate Structure in PET Backbone	144
6.2.4	Mode of Action of Phosphorus Flame Retardants in Polyethylene Terephthalate Fabrics and Materials That Interfere	145
6.2.5	Bromine-Containing FR in PET Fibers	145
6.2.6	Flame Retarding Polyethylene Terephthalate Fabric by a Thermosol Finishing Process	146
6.2.7	Flame Retarding Polyethylene Terephthalate Molding Resin by an Aromatic Diphosphate	147
6.2.8	Flame Retarding Polyethylene Terephthalate by Other Phosphorus-Containing Additives	147
6.3	Polybutylene Terephthalate	147
6.3.1	Polymeric and Oligomeric Brominated Flame Retardants in PBT	148
6.3.2	PBT with Other Bromine-Containing Additives	150
6.3.3	Polybutylene Terephthalate/Polycarbonate Blends	151
6.3.4	Nonhalogen Flame Retardant Polybutylene Terephthalate - Phosphorus Flame Retardant Additives	152
6.3.5	Nonhalogen Flame Retardant Polybutylene Terephthalate - Phosphinate Salt Additives	153
6.3.6	Nonhalogen Flame Retardant Polybutylene Terephthalate - Aromatic Phosphate Additives	155
6.3.7	Nonhalogen Flame Retardant Polybutylene Terephthalate Using Melamine Cyanurate or Sulfate	156
6.4	References	157
7	Flame Retardants in Commercial Use or Development for Polycarbonates and Polycarbonate Blends	161
7.1	Introduction	161
7.2	Bromine-Based Flame Retardancy	162

7.3	Antidripping Additives	164
7.4	Nonhalogen Flame Retardancy – General Comments	165
7.4.1	Phosphates	165
7.4.2	Other Phosphorus Compounds	166
7.4.3	Sulfonate Salts	166
7.4.4	Other Salts	170
7.4.5	Silicone-Based Systems	170
7.5	Polycarbonate-ABS Blends	171
7.5.1	Halogen Additives in PC Blends	172
7.5.2	Phosphorus Compounds in Blends of Polycarbonates and ABS	172
7.5.3	Other Classes of Phosphorus Additives in PC-ABS Blends	176
7.5.4	Other Flame Retardant Systems for PC-ABS Blends	177
7.6	Polycarbonate-Polyester Blends	177
7.7	Other Polycarbonate Copolymers and Blends	178
7.8	Structural Approaches (Laminates)	179
7.9	Modified End Groups and Other Structural Changes	180
7.10	Conclusions	180
7.11	References	181
8	Flame Retardants in Commercial Use or Development for Unsaturated Polyester, Vinyl Resins, Phenolics	187
8.1	Introduction	187
8.2	Halogen-Containing Unsaturated Polyester Resins	188
8.3	Vinyl Ester Resins	190
8.4	Hydrated Mineral Fillers	192
8.4.1	Combinations of ATH and Decabromodiphenyl Oxide or Other Polybrominated Additives	193
8.5	Low-Smoke Polyester Resins	193
8.5.1	Low-Smoke, Unsaturated Acrylate Oligourethane Resins with Alumina Trihydrate	194
8.6	Phosphorus-Containing Flame Retardant Polyester Resins	195
8.6.1	Phosphorus Reactives in Unsaturated Polyester Resins	197
8.6.2	Phosphorus-Melamine Combinations in Unsaturated Polyester Resins	198
8.7	Borates in Unsaturated Polyester Resins	198
8.8	Phenolic Composites	198
8.9	The Effect of Glass Reinforcement on the Fire Performance of Reinforced Unsaturated Polymer Composites	200

8.10	Protective Veils	200
8.11	References	201
9	Flame Retardants in Commercial Use or Development for Polyurethanes, Polyisocyanurates, and Polyureas	205
9.1	Introduction	205
9.2	Commercial Flame Retardance of Rigid Foams	206
9.2.1	Additives in Rigid Foams	206
9.2.2	Reactive Flame Retardants - General Comments	210
9.2.3	Reactive Flame Retardants in Rigid Polyurethane Foams	210
9.2.4	Impact of Blowing Agent on the Flame Retardancy of Rigid Foams	211
9.2.5	Brominated Alcohols as Reactive Flame Retardants	213
9.2.6	Nonhalogenated Polyols Favorable to Flame Retardancy in Rigid Foams	214
9.2.7	Additives in Isocyanurate Foams	215
9.2.8	The Effect of Catalyst Choice on Flame Retardancy of Rigid Foams	216
9.3	Flame Retardance of Flexible Foams	217
9.3.1	Additives in Flexible Foams	218
9.3.2	Additives in Flexible Foams - Volatility Considerations ("Fogging")	219
9.3.3	Halogen-Free Additives for Flexible Foams	220
9.3.4	Overcoming the "Scorch" Problem in Flexible Foams	221
9.3.5	Reactive Flame Retardants for Flexible Foams	223
9.3.6	Polyols Favorable to Flame Retardancy in Flexible Foams	224
9.3.7	Melamine in Flexible Foams	225
9.3.8	Other Solid Additives in Flexible Foam	226
9.3.9	Silicone Surfactants Favorable to Flame Retardancy in Flexible Foams	227
9.3.10	Effect of Foaming Catalysts on Air Flow, Flame Retardancy, and Smoldering Combustion	228
9.3.11	The Flammability of Upholstered Flexible Foam in Furniture ..	229
9.3.12	Effect of Fillers on Flame Retardancy of Flexible Foams	229
9.3.13	Rebonded Foam	229
9.3.14	Combinations of Polyurethane and Other Foaming Polymers ..	230
9.3.15	Basic Studies on Flammability and Flame Retardant Action in Flexible Foams	230
9.4	Polyurethane Elastomers and Cast Resins	230
9.5	Reaction-Injection Molded Products	232

9.6	Urethane Coatings and Sealants	233
9.7	Polyureas	233
9.8	References	234
10	Flame Retardants in Commercial Use or Development for Epoxy Resins	241
10.1	Introduction	241
10.2	Electrical and Electronic Applications	241
10.3	Brominated Flame Retardants in Printed Wiring Boards (PWB)	243
10.3.1	A Challenge to Tetrabromobisphenol A	244
10.4	Nonhalogen Alternatives to Tetrabromobisphenol A	246
10.4.1	High Loadings of Metal Hydroxides and Inorganic Fillers	247
10.4.2	Red Phosphorus Plus ATH	248
10.4.3	Other Additive Phosphorus Compounds in PWB	248
10.4.4	Reactive Phosphorus Compounds in Epoxy Resins; DOPO Systems and Others	250
10.4.5	Use of Metal Hydroxide Additive, Char Favoring Curing System, and Char Promoter	254
10.5	Resin Design for Flame Retardancy	255
10.6	A Multipronged Approach to PWB Formulation – Resin Design, Filler, Interphase Control	256
10.7	Carbon-Reinforced Epoxy Resins in Aircraft Applications	256
10.8	Flame Retarding Epoxy Coatings	257
10.9	References	260
11	Flame Retardants in Commercial Use or Development for Textiles	265
11.1	General Background	265
11.1.1	A Brief Review of the History of Flame Retardant Textiles	266
11.1.2	Flammability of Textiles (General Comments)	266
11.1.3	Modes of Action	267
11.1.4	Detrimental Effects on Flammability	267
11.2	Nondurable Treatments	268
11.2.1	Nondurable Treatments of Cotton and other Cellulosics	268
11.2.2	Nondurable Treatments for Polyester	269
11.2.3	Semidurable Treatments for Cotton	269
11.2.4	Further Development of the Phosphorylation of Cellulose	270
11.3	Backcoating with Phosphorus-Containing Formulations	271

11.4	Durable Finishes	273
11.4.1	THPX Finishes for Cellulosics and Blends	273
11.4.2	Improvements and Recent Developments in the THPX Type of Finish	275
11.4.3	New Products Using the Proban Treatment	276
11.4.4	THPX Processes not Using Gaseous Ammonia	277
11.4.5	Pyrovatex® CP and Similar Competitive Products	277
11.4.6	Other Durable Finishes for Cotton and Blends	279
11.5	Thermosol Flame Retardant Treatment of Polyester Fabric	280
11.6	Nylon Topical Finish	281
11.7	Wool	281
11.8	Processes with Broad Application for Synthetics and Blends	282
11.9	Coating with Bromine-Containing Emulsion Polymers	284
11.9.1	Coating with Chlorinated and Chlorobrominated Paraffins	284
11.9.2	Backcoating of Carpets; Metal Hydroxide Fillers	285
11.10	Melt Processable Additives in Polypropylene Fibers	285
11.11	Melt Processable Additives in Polyester Fibers	286
11.12	Inherently Flame Retardant Fibers	287
11.12.1	Rayon	287
11.12.2	Inherently Flame Retardant Polyester Fibers	288
11.12.3	Polyamides; Aramids	289
11.12.4	Polyimide Fibers	290
11.12.5	Melamine Fibers	290
11.12.6	Glass Fabric	290
11.12.7	Basalt Fibers	291
11.12.8	Silicic Acid-Containing Rayon Fibers (Visil®)	291
11.12.9	Halogen-Containing Fibers	291
11.12.10	Polyphenylene Sulfide Fibers	292
11.12.11	Oxidized Polyacrylonitrile Fibers (Pyron)	292
11.13	Technology Related to Mattresses	292
