Contents

	Preface to the Third Edition	**V**
	Editor's Preface to the Second Edition	**VII**
	The Authors	**IX**
	Translation	X
Notes	**How to Use this Book**	**XI**
Notes	**Abbreviations and Symbols**	**XIII**
Introduction	**Plastic – An Artificial Material?**	**XIX**
Lesson 1	**Plastics Fundamentals**	**1**
	1.1 What are "Plastics"?	1
	1.2 What are Plastics Made of?	2
	1.3 How to Classify Plastics?	2
	1.4 How are Plastics Identified?	4
	1.5 What are the Physical Properties of Plastics?	5
	1.6 Performance Review – Lesson 1	8
Lesson 2	**Raw Materials and Polymer Synthesis**	**9**
	2.1 Raw Materials for Plastics	9
	2.2 Monomers and Polymers	11
	2.3 Polyethylene Synthesis	13
	2.4 Methods of Polymer Synthesis	15
	2.5 Performance Review – Lesson 2	21

Lesson 3 **Classification of Plastics** 23
3.1 Bonding Forces in Polymers and Their Temperature Behavior 24
3.2 Identification of Categories of Plastics 26
3.3 Thermoplastics 26
3.4 Cross-Linked Plastics (Elastomers and Thermosets) . . 28
3.5 Fabrication and Processing Methods 30
3.6 Methods for Shaping Thermoplastics 31
3.7 Performance Review – Lesson 3 32

Lesson 4 **Deformation Behavior of Plastics** 35
4.1 Behavior of Thermoplastics 35
4.2 Amorphous Thermoplastics 36
4.3 Semicrystalline Thermoplastics 37
4.4 Behavior of Cross-Linked Plastics 39
4.5 Performance Review – Lesson 4 41

Lesson 5 **Time-Dependent Behavior of Plastics** 43
5.1 Behavior of Plastics Under Load 43
5.2 Effect of Time on Mechanical Behavior 45
5.3 Recovery Behavior of Plastics 46
5.4 Dependence of Plastics on Temperature and Time . . . 47
5.5 Performance Review – Lesson 5 51

Lesson 6 **Physical Properties** 53
6.1 Density 53
6.2 Thermal Conductivity 54
6.3 Electrical Conductivity 55
6.4 Transparency 56
6.5 Material Characteristics of Plastics 57
6.6 Performance Review – Lesson 6 61

Lesson 7 **Fundamentals of Rheology** 63
7.1 Fundamentals 63
7.2 Flow and Viscosity Curves 66

7.3 Flow Behavior of Plastic Melts 66
7.4 Melt Flow Index (MFI) 68
7.5 Performance Review – Lesson 7 70

Lesson 8 Plastic Applications 71
8.1 Fundamentals 72
8.2 Requirements Criteria – Material Selection – Manufacturing Processes 72
8.3 Examples of Plastic Applications 76
8.4 Performance Review – Lesson 8 82

Lesson 9 Plastics Compounding 83
9.1 Fundamentals 83
9.2 Metering 85
9.3 Mixing 85
9.4 Plasticizing 87
9.5 Pelletizing 89
9.6 Crushing 91
9.7 Performance Review – Lesson 9 92

Lesson 10 Extrusion 93
10.1 Fundamentals 93
10.2 Extrusion Lines 94
10.3 Coextrusion 103
10.4 Extrusion Blow Molding 104
10.5 Blown Film Process 107
10.6 Performance Review – Lesson 10 108

Lesson 11 Injection Molding 111
11.1 Fundamentals 111
11.2 Injection Molding Machine 113
11.3 The Injection Mold 117
11.4 Process Flow 119
11.5 Other Injection Molding Processes 123
11.6 Examples and Products 125
11.7 Performance Review – Lesson 11 126

Lesson 12 **Fiber-Reinforced Composites (FRC) 127**
12.1 Fundamentals 127
12.2 Materials 128
12.3 Process Flow 129
12.4 Hand Lay-Up 130
12.5 Automated Processing Methods 131
12.6 Performance Review – Lesson 12 135

Lesson 13 **Plastic Foams 137**
13.1 Fundamentals 137
13.2 Properties of Foams 138
13.3 Foam Production 141
13.4 Examples and Products 144
13.5 Performance Review – Lesson 13 145

Lesson 14 **Thermoforming 147**
14.1 Fundamentals 147
14.2 Process Steps 149
14.3 Technical Installations 151
14.4 Examples and Products 152
14.5 Performance Review – Lesson 14 153

Lesson 15 **Additive Manufacturing 155**
15.1 Fundamentals 155
15.2 Plastics for Additive Manufacturing 158
15.3 Operating Steps and Process Parameters 160
15.4 Examples and Products 163
15.5 Performance Review – Lesson 15 164

Lesson 16 **Plastic Welding 165**
16.1 Fundamentals 165
16.2 Process Steps 166
16.3 Welding Processes 167
16.4 Examples and Products 172
16.5 Performance Review – Lesson 16 173

Lesson 17 Machining Plastics 175
17.1 Fundamentals 175
17.2 Cutting Processes 176
17.3 Performance Review – Lesson 17 180

Lesson 18 Bonding of Plastics 181
18.1 Fundamentals 181
18.2 Bondability and Adhesive Joints 184
18.3 Classification of Adhesives 186
18.4 Bonding Process 187
18.5 Examples and Products 188
18.6 Performance Review – Lesson 18 189

Lesson 19 Plastic Waste 191
19.1 Fundamentals 191
19.2 Plastics Production and Its Applications 192
19.3 Plastic Products and Lifetime 194
19.4 Avoiding and Recycling Plastic Waste 196
19.5 Circular Economy in Plastics Business 197
19.6 Performance Review – Lesson 19 199

Lesson 20 Plastics Recycling 201
20.1 Fundamentals 201
20.2 Mechanical Recycling 203
20.3 Chemical Recycling 206
20.4 Thermal Recovery 207
20.5 Recycling of Plastic Waste 209
20.6 Examples and Products 209
20.7 Performance Review – Lesson 20 213

Lesson 21 Qualification in Plastics Processing 215
21.1 Fundamentals 215
21.2 Plastics Training in Industry 216
21.3 Plastics Training in the Skilled Trades/Crafts Sector 223

Appendix Selected Literature 227

Appendix Glossary of Plastics Technology 233

Appendix Answers 255
