

# Contents

<b>The Author .....</b>	<b>V</b>
<b>Preface .....</b>	<b>VII</b>
<b>1      Introduction .....</b>	<b>1</b>
<b>2      Polymers, Markets, Applications, and Additives .....</b>	<b>7</b>
2.1    Introduction .....	7
2.2    The Market .....	10
2.3    Development of Plastics .....	16
2.4    Basic Chemistry, Properties, and Applications .....	21
2.5    Additives .....	30
<b>3      Rheology of Molten Polymers .....</b>	<b>33</b>
3.1    Introduction .....	33
3.2    Viscosity and Normal Stress .....	39
3.3    Measurement of Viscosity .....	47
3.3.1    Introduction .....	47
3.3.2    Cone-and-Plate and Plate-and-Plate Rotational Viscometers .....	47
3.3.3    Concentric-Cylinder Viscometer .....	49
3.3.4    Capillary Viscometer .....	50
3.3.5    Melt Flow Indexer .....	52
3.4    Basic Mathematical Relationships .....	53
3.4.1    Introduction .....	53
3.4.2    The Power Law .....	54

3.4.3	Curve Fitting .....	55
3.4.4	Selection of Viscometer .....	56
3.4.5	Rabinowitsch Correction .....	57
3.4.6	Bagley Correction .....	58
3.4.7	Temperature Effects .....	59
3.4.8	Pressure Effects .....	60
3.4.9	Molecular Weight Effect .....	61
3.5	Die Flow Characteristics and Melt Flow Instabilities .....	61
3.5.1	Slip Velocity.....	61
3.5.2	Extrudate Swell .....	62
3.5.3	Sharkskin .....	64
3.5.4	Melt Fracture .....	65
3.5.5	Draw Resonance .....	65
3.5.6	Die Lip Buildup .....	66
3.6	Other Considerations .....	67
3.6.1	Stress Relaxation .....	67
3.6.2	Dynamic Measurement and Complex Viscosity .....	67
3.6.3	Shear and Elongation Mixing .....	69
3.6.4	Rheology of Additive-Added Polymers .....	70
3.6.5	Rheology in Quality Control .....	71
<b>4</b>	<b>Powder Technology in Plastics Processing .....</b>	<b>75</b>
4.1	Introduction .....	75
4.2	Basic Characteristics of Particulate Solids .....	76
4.2.1	Measurement of Particle Size, Size Distribution, and Shape.....	76
4.2.2	Density of Particulate Solids .....	82
4.3	Mixing, Segregation, and Sampling .....	84
4.4	Interparticle Forces .....	88
<b>5</b>	<b>Brief Historical Development of Plastics Extrusion .....</b>	<b>91</b>
<b>6</b>	<b>Single-Screw Extrusion .....</b>	<b>107</b>
6.1	Introduction .....	107
6.2	Overview of the Geometric and Functional Characteristics of Plasticating Extruder Screws .....	109
6.3	Conventional Analysis of Functional Characteristics of Extrusion .....	113
6.3.1	Solid Conveying (Feed Zone).....	113

6.3.2	Compression/Melting Zone .....	118
6.3.3	Metering Zone .....	122
6.4	Functional Extrusion Characteristics by the Visualization Technique ....	125
6.4.1	Introduction .....	125
6.4.2	Physical Model of Dynamic Extrusion Characteristics by Visualization .....	130
<b>7</b>	<b>Dynamic Processing Characteristics of Co-Rotating Twin-Screw Extrusion by Visualization .....</b>	<b>143</b>
7.1	Introduction .....	143
7.2	Overview of Twin-Screw Extrusion .....	144
7.3	Basic Conventional Analysis on Processing Characteristics of CICO Extrusion .....	148
7.4	Developing Physical Dynamic Processing Models of CICO Extrusion by Direct Visualization .....	150
7.4.1	Introduction .....	150
7.4.2	Physical Processing Models .....	152
7.4.2.1	Solid Conveying .....	152
7.4.2.2	Melting .....	158
7.4.2.3	Kneading .....	161
7.4.2.4	Other Visual Observations .....	162
<b>8</b>	<b>Concluding Remarks .....</b>	<b>169</b>
<b>Appendix A</b>	.....	<b>173</b>
<b>Appendix B</b>	.....	<b>179</b>
B.1	Examples of Screw Configurations Deviating from the Conventional Single-Flighted Square-Pitch Screw .....	179
B.2	Basic Visualization Experimental Setup .....	180
B.3	Summary of Tadmor Melting Model Equations for Newtonian Fluids ....	182
B.4	Summary of Lindt Melting Model Equations .....	184
B.5	Equations for Melt Conveying .....	185
B.6	Symbols Used .....	186
<b>Appendix C</b>	.....	<b>189</b>
<b>Index</b>	.....	<b>193</b>
